Common Errors and Solutions

Below is a list of common errors encountered while using the SMS APIs, along with their possible causes and solutions.

1. Invalid Credentials

Possible Causes:

- Incorrect **API Key** (Most cases: you have acquired an **App Key** instead of an **API Key**).
- Incorrect **Partner ID**.
- Your account does not have an active user under it.

Solution:

- Verify that you are using the correct **API Key** (not the App Key).
- Ensure the **Partner ID** matches what was assigned.
- Double-check the **Sender ID** and ensure it is spelled exactly as assigned.

2. Sender is not assigned

Possible Causes:

- The **Sender ID** is not assigned to your account.
- Wrong **Sender ID Name** (**Case-sensitive**: Use exactly as assigned).

Solution:

- Check if the Sender ID has been properly assigned.
- Contact support if the issue persists.

3. Insufficient Units

Possible Causes:

- Your account does not have enough SMS units to send messages.

Solution:

- Purchase additional SMS units.
- Check your account balance before sending bulk messages.

4. Unsupported Numbers

Possible Causes:

- Some mobile number prefixes may not be supported.

Solution:

- If you need to send messages to unsupported prefixes or international numbers, **contact support first** to confirm compatibility and requirements.
-

If you experience any of the above errors and need further assistance, feel free to reach out to tech@advantasms.com.
